Vue.js - Nuxt - Laravel - Strapi - Node.js - WordPress - PHP - WooCommerce - PostgreSQL - CodeIgniter - Firebase - Electron - Tailwind - API Integrations - Scraping (BrightData) - Tailwind - Quasar - Digital Marketing - Automation - GraphQL

SENIOR IT & FULL STACK DEV.

Cohen & Aguirre - Madrid 　　　　　　　　*May 2023 - Today*

◆ Built and maintained 3 apps (Business Portal, Immigration Portal, Job Board) using Nuxt and Laravel. I've successfully built, launched, and maintained all three apps, ensuring they were optimized and scalable for future use.
◆ Created a scraper for each platform with BrightData, syncing more than +1000 of business, homes and jobs listings per week into the platform, replacing slow manual sourcing and giving the sales team fresh leads daily.
◆ Set up CI pipelines for each app, and a custom optimized WordPress hosting service (15+ sites), reducing deployment times, and saving a lot of money in infrastructure.
◆ Reorganized and Automated the internal workflows of each team using: Google Workspace, Monday, GoHighLevel, Make & N8N to save time and reduce overhead, saving the marketing and sales teams a combined 20+ hours per week in repetitive tasks. With the goal of becoming a 4 days week company

FULL STACK DEVELOPER

Symphonic Engage - Remote 　　　　　　　　*Nov 2021 - Today*

◆ PPNHCO: Built a Wordpress Tableau sync script, MVC plugin, and Touchpoint (Vue app) to list physicians and opportunities
◆ MedPOINT Management: Developed learning platform for physicians comply with California healthcare regulations, using Strapi, Nuxt & Tailwind
◆ Webleash: Built browser-like Electron app, using Vue + Firebase
◆ Astrology Zone: Maintained +10.000 subscribers WooCommerce site

FULL STACK DEVELOPER

Freelancer 　　　　　　　　*May 2018 - Nov 2021*

◆ I worked for more than 15 clients at Upwork and other platforms from different parts of the world. With different scopes and requirements that range from technical support to developing and updating new themes and plugins for the WordPress platform. I have been rated on average of 4.93/5 stars per job done
◆ Planning, Refactoring, Designing, and Developing Web Applications and features mostly on Vue & Next as Front-end and Strapi as Back-end.
◆ Development of WordPress and WooCommerce sites, customized Themes and Plugins, and other standalone PHP apps.
◆ Design, develop, and implementing React single-page applications.
◆ Consulting about Web Marketing and SEO; and technical support.

FULL STACK DEVELOPER

OrinocoDev - Venezuela 　　　　　　　　*May 2018 - Feb 2019*

◆ Co-designed & built Vue + GraphQL crypto exchange (13k+ users, 265k+ transactions)
◆ Refactored legacy code, added features to apps (Node + Vue, Quasar)
◆ Implemented TDD with Jest to reduce tech debt and boost team productivity
